

*A sampling of COMPUTER SCIENCE &
INFORMATION TECHNOLOGY
field placements available through
The Philadelphia Center:*

Innovation Philadelphia; IT Intern: Innovation Philadelphia's mission is to grow the technology and knowledge industry sectors of the Philadelphia economy, to attract and retain young professional knowledge workers, and to generate the innovative ideas that will define Philadelphia's future. The Information Technology Internship will assist the IT department in all aspects of its functioning including web site development and maintenance, technology training and help desk functions for IP staff, maintenance and administration of network, database developments and management, problem solving as needed and other IT issues and assistance needed throughout the office. The ideal candidate will have coursework in business administration with a concentration on management and information systems or computer and information science.

Philadelphia City Paper; Web Intern: The Philadelphia City Paper is the city's leading alternative weekly newspaper with listings and feature articles in music, arts, movies, and news. The Philadelphia City Paper was founded in November of 1981 and has the largest readership of any weekly newspaper in Philadelphia, covering the eight counties in the Philadelphia region. Our award-winning news, arts and entertainment coverage has also helped to establish City Paper as Philadelphia's leading weekly newspaper. City Paper is a controlled-circulation newspaper, distributed free every Thursday morning to over 2,000 locations. The Webmaster Assistant will help City Paper with all aspects of website maintenance. Responsibilities include assisting with weekly published content as well as helping to transfer back issues to the current website. Skill sets necessary are: HTML and CSS. Any Javascript or programming experience is a plus. Familiarity with Macintosh is also a big plus

Science Center; Intern: The Science Center, established in 1963, assists early stage Life Science and Technology companies in accelerating their commercialization and provides the infrastructure and community they need to flourish. As a powerful economic engine for the regional economy, the Science Center also provides a "soft landing" for International companies to launch their US businesses. The Center is now an important engine of economic growth for the entire region and beyond, having helped build over 350 new technology and life science companies -- companies that have since created thousands of high paying jobs, attracted millions of dollars of investment to the region, and significantly expanded the region's tax base. Many opportunities are available with dozens of differently companies.
